GERMANY

## epiAge Instructions for use

### TEST KIT FOR SALIVA COLLECTION

*Please take 3-5 minutes for the test*

### WARNING!

- Do not swallow the preservation fluid
- Avoid eye contact with the fluid
- Keep out of reach of children

**1** Carefully unscrew the blue cap from the test tube containing the preservation fluid and screw the funnel onto the tube.

**Caution:** 30 minutes before saliva collection, strictly **avoid** eating, drinking, smoking, tooth brushing, chewing gum, etc.

**2** Repeatedly spit clean saliva (not mucus) into the funnel, which you have just affixed onto the test tube, until the tube is filled to the arrow marking (5ml).

**Please note:** Spit patiently several times into the funnel. Take your time inbetween spits.

**3** Carefully unscrew the funnel from the tube to avoid spilling the collected saliva.

**4** Screw the blue cap back onto the test tube. Turn it upside down and shake it 10-15 times to ensure that the saliva and the preservation fluid are completely blended.

**5** Place the test tube into the ziplock bag.

**6** Please store this leaflet carefully as it contains the **digital secure ID** you will require in order to retrieve your test result.

**7** Send in the sample using the enclosed shipping slip.

*Please follow the instructions of the reseller where you purchased the test.*

**8** Register the test kit here: [www.epi-age.de/register](http://www.epi-age.de/register)

**Without registration, you **CANNOT** retrieve your test result!**
